Dear: Property Owner

RE: [REDACTED] New York NY [REDACTED]

Verizon is pleased to be working with you as we build out our FiOS network! This amazing network is in your neighborhood, and now we want to bring it to your block.

Verizon and its engineering/design representative, **Network Infrastructure**, will work closely with you to bring these services to your block. We are surveying your block, and we must confirm your approval of the design plan for the installation of our FiOS facilities on your property. Verizon's design proposal takes into account the safety, functioning and appearance of the premises. In addition, Verizon will bear the cost of the installation of its FiOS facilities. Please review the enclosed documentation and provide us with your approval and signature on the Certificate of Acceptance of Proposed Work as soon as possible.

Verizon is working hard to place FiOS facilities in your block in order to meet commitments to our customers to provide television services over our FiOS network. For additional information on Verizon's process for installing cable television facilities on private property, please see the enclosed form, "Notice of Intention to Install Cable Television Facilities and Service," which includes a copy of the applicable New York law related to this process. When a resident in your building places an order for FiOS services, Verizon may need to return to survey the interior of your building.

If you would like to discuss our proposed design plan or if you have any other questions, please contact **Michael McVey** of **Network Infrastructure** at 516-385-3030 ext 130 or email muncvey@networkinfrastructure.biz

Thank you for your cooperation and assistance.

Sincerely,

NYC FiOS Real Estate Department
